

## Neutralizing E-Smog inside a building

SITAC CARDS® repolarize the whole power supply system in an apartment (A6 or A5) or in a single-family home (size A5 or A4 depending on the insensitivity). In order to change the electric polarity, the SITAC CARDS® are to be scotched on the fuse box.

The advantage of using SITAC CARDS® consists in the fact that after their installation the electric and electromagnetic radiation of all the connected devices (hair dryer, kitchen range, clock radio, printer, computer, TV set, lamps, etc.) vibrates with a *right-spin* (see chapter [Left- / Right-Spin](#)) on our homepage), which is no more harmful to human organism; excepting microwave ovens. More information about the SITAC CARDS® are published on our homepage and available as separate flyer.

## Clearing of the radiation from mobile phone antennas and power lines

In order to harmonize this kind of radiating sources we developed the IMERA®-DISC. This silicon-disc with a diameter of 22cm is to be placed directly on the wall, resp. by the window which is orientated against the disturbing source.

The IMERA®-DISC creates a tachyon field which acts similar to a protective shield.

## Competent scientific studies and analysis

On our homepage [www.biotac-tecline.com](http://www.biotac-tecline.com) we published several analyses which have been made in correlation with neutralizing radiation from mobile phones by integrating our HANDY-CHIP®.

All studies perfectly prove that our HANDY-CHIP® is capable to noticeably reduce and harmonize the harmful electromagnetic radiation.

In particular the studies that have been conducted by the method developed by the Japanese scientist Dr. Masaru Emoto clearly demonstrate the amazing potential of the tachyonized HANDY-CHIP®.

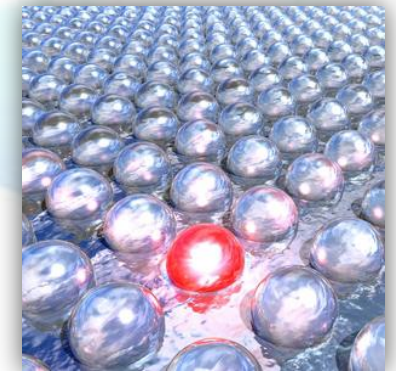

# PROTECTION AGAINST E-SMOG

## Devices for:

**mobile phones**  
**DECT cordless phones**  
**Bluetooth®-systems**

**Computer monitors**

**power lines**  
**mobile phone antennas**

TACHYON ENERGY SYSTEMS

## Use your mobile phone without fear

The tachyonized goldplated (24ct) HANDY-CHIP® neutralizes harmful electromagnetic radiation of mobile phones, pagers and digital DECT cordless phones. With a slender 0,2mm in thickness and a diameter of 21mm it fits into even the tiniest mobile phone !

By applying the HANDY-CHIP® inside the phone (stick it directly on the battery or outside the phone), this little tachyon device will create a powerful field of tachyons around the phone that durably repolarizes all harmful electric and electro-

magnetic radiation, which leads to a palpable relief for the whole organism. Most of the known symptoms related to electric smog are transformed in a short time.

## DECT cordless phones and Bluetooth® headsets

The two goldplated (24ct) BT CHIPS® reliably repolarize harmful radiation of cordless phones and Bluetooth®-Headsets!

To do so, stick the larger BT-CHIP® outside the DECT transmitting station and the smaller one outside the DECT-phone; resp. the larger chip into the mobile phone (on the battery) and the smaller chip outside on the Bluetooth® headset.

## Work more concentrated with your PC and laptop

The tachyonized gold plated (18ct) MONITOR-DISC® neutralizes harmful radiation of:

- boob-tube monitors
- notebooks
- flat screen monitors
- laptops and TV sets

The PC CARD® (credit card size) has been developed to repolarise electromagnetic radiation of PC towers, laptops and notebooks. Just stick the card under the keyboard or on the rear side of your PC (near the power cable).

With the aid of the pleomophology (dark field microscopy) parasitic influences can easily be detected in the hameogram (blood picture). The left-spin orientated radiation of electromagnetic fields leads very often to different side effects. Furthermore, the high amount of bluelight frequency of quicksilver light in LCD and TFT monitors disturbs the metabolism of the retina and causes forming intensified free anaerobic radicals.

To protect one from both radiation, the MONITOR DISC® should be placed on the rear side of the monitor.

The big advantage of the MONITOR-DISC® consists in the fact that it cannot be overloaded as for instance a rose quartz.

Both the PC CARD® and MONITOR DISC® work reliably for years and years !

## Protect your body reliably from electric smog

The tachyonized goldplated (24ct) GOLDCARD® (credit card size) made out of pure silicon protects reliably the whole organism from the influences of harmful electric and electromagnetic interfering fields.

The GOLDCARD® has been conceived for persons which expose themselves daily to electric smog generating devices such as computers, screens, cashier registers, photocopiers, mobile phone antennas, TV, train, cars, etc. etc.

The whole nervous system of the human organism is primarily controlled by the flux of electrons.

The precious metal gold with its particular atomic structure and its unique electric potential affects the electric and electromagnetic conditions of every single human body cell. Tachyonized gold is capable to harmonize in a short space of time any faulty electric potential. With good reason most of our protection devices for e-smog are manufactured with a highly valuable alloy using pure gold and pure brass.

For your protection, we recommend to put the GOLDCARD® directly in the breast pocket of your shirt. Do not remove it from its protecting laminate !

As already stated: the GOLDCARD® works reliably for years and years !
