

An important contribution for the environmental protection

After 15 years of intense research and development we may now proudly and successfully present a sensational product: **BIOTAC GreenBox®** - the revolutionary system that seems to baffle all reason.

It clearly reduces the toxic pollutants of combustion engines and helps to relieve the environment. Our system has been designed for petrol and diesel engines (cars & trucks). The evaluation of chemical analysis indicates clearly the reduction of the following toxic pollutants:

Average reduction according to the last test results: benzene by 43%, toluene by 58%, ethylbenzene by 67%, xylene by 61%, nitrite by 25% and hydrocarbon by 46%.

Thanks to our special Tachyon Energy device we are now able to affect on the combustion and on the exhaust emissions.

Be assured that by integrating our system you personally will contribute discharging our environment from tons and tons of toxic pollutants!

Certified scientific studies and analyses

Currently we proudly present four different analyses related to the optimization of the exhaust fumes with diesel and gasoline engines by our tachyon device.

All test results prove clearly that our system is able to remarkably reduce the harmful exhaust fumes! On our homepage www.biotac.ch you can download the latest excerpts as PDF files.

We would be very pleased if you contribute in a very active way and help to discharge our environment.

Have a good trip!

TACHYON ENERGY SOLUTIONS

The advantages and disadvantages of automobiles have been sufficiently discussed from many different sides. A pleasure to some, annoyance to others. In response to this we developed a system which serves the reduction of pollutant exhausts (diesel & gas engines):

For the first time in a long while we may proudly present the most spectacular tachyon product: the **BIOTAC GreenBox®**: this system is capable to reduce harmful exhausts by up to 87,5%.

The chemical analyses represent a sensation. They clearly prove the positive changes for the environment.

Another approach relates to the wellbeing inside the car. By using our special tachyon products you will feel much more relaxed. Come and take pot luck !

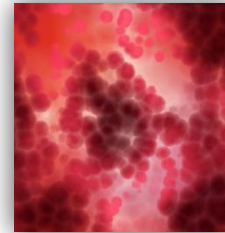

Neutralizing electric smog inside the car

Harmful electromagnetic fields are produced in vehicles as a result of electric leads and devices such as car battery, radio, air conditioning, navigation system, heating etc.

Measurements illustrate that this radiation can reach up to 500nT (Nanotesla) or more. According to current scientific evaluation, a magnetic field of 300nT is already sufficient to considerably diminish the natural ion exchange between body cells.

Symptoms such as tiredness, nausea, headache, concentration loss or burning eyes can result. With pleomorphology (darkfield microscope diagnosis), corresponding damages can be identified in the human blood.

By sticking the **MOTAC ELECTRO®** silica disc to the alternator or the battery, the internal electric circuit is perpetually positively repolarized. Long distance drivers, electro-sensitive individuals and persons suffering from travel sickness will immediately notice the difference.

After installing the tachyonized disc, all passengers will noticeably feel better.

driving more relaxed arriving in good shape

The body work of a vehicle acts as a conductor in the way of a Faraday Cage. Even strongest lightning will not penetrate to the inside of the automobile.

Passengers are effectively protected against natural electromagnetic lightning. However, the bodywork repulses natural positive radiation, as e.g. negative polarized ions which often leads to tiredness or travel sickness, due to lack of negative polarized ions.

By sticking the tachyonized **MOTAC FENG SHUI®** silica discs inside the car (on both windshields), the amount of negative polarized ions will noticeably increase due to the tachyon energy fields.

Their positive effects can immediately be felt because all body cells are more oxygenated. This stimulates the whole organism in a very positive way. Since the introduction in 1999 thousands of persons benefit from this very efficient tachyon product.

Its positive effects last forever!
