

GOLD AND NATURAL MEDICINE

This precious metal plays a very important role in the medicine; since the 20s of the last century compounds of gold are delivered as reliable and proven base therapy in case of rheumatic diseases. Medicaments with potentialized gold are known for a long time and used for health problems, such as:

- in case of baseless fears
- strengthens intuitive thinking
- in case of burn-out syndrome
- give courage and confidence
- assists in case of taedium vitae
- if suffering from heart problems

WATERCRYSTAL - STUDY 2012

The details and photos of this study are published on our homepage energy-cards.com. From a biologic-scientific point of view the results may be considered as highly positive and very surprising, as the shapes of the crystals are really unique !

THE OTHER ENERGY CARDS

the SILVER CARD	- promotes self-healing
the COPPER CARD	- strengthens the organisms
the GREEN CARD	- physical regeneration
the VITA CARD	- profound relaxation
the FOOD CARD	- energizing food & beverages
the PC CARD	- for electrical appliances

SCIENTIFIC STUDIES

All studies -which by the way have been realized by independent research laboratories- show the effectiveness of the BIOTAC LINE® products and describe their potential as quite exceptional.

DISCLAIMER

This booklet serves as information about methods for preventive health care and self help. Whoever applies this information does it with its own responsibility. We have no notion to transmit any diagnoses or therapeutic recommendations. The procedures stated in this booklet are not to be understood as alternatives for professional medical treatments. Don't hesitate to contact your physician or doctor in case of illness !

VITA LINE GOLD CARD

**PROMOTES SUCCESS
ENHANCES THE POWER
OF CONCENTRATION**

THE BIO-ENERGETIC AND PHYSICAL POTENTIAL OF GOLD

This precious metal with its particular atomic structure and its unique electric potential affects the electric and electromagnetic conditions of every single human body cell. Tachyonized gold is capable to harmonize in a short space of time any faulty electric potential.

The GOLD CARD offers two completely different applications:

- A) to inform water, featuring similar properties as colloidal gold water
- B) to protect oneself from electric smog such as radiation from LCD flat screens

In order to energize water just put the GOLD CARD under a glass or a jar filled with fresh water. In a little while (~3 minutes) the water is ready. You can leave the card during the day (and over night) under the jar and refill it from time to time with fresh water.

In order to protect yourself from the radiation of computer screens, just put the credit card sized GOLD CARD in the pocket of your shirt or suit. worn at this height, the tachyon field that arises around the card will directly act on the thymus gland and on the thyroid. You'll see: you will have more energy and be able to much better concentrate !

GOLD CARD FOR TFT/LCD SCREENS

The most noted perturbing source in your work area represents at the same moment one of the most important working appliance: the computer screen. As it is known, not only the electromagnetic spectrum of a flat screen exerts a harmful effect on our organism: but mainly its backlight.

This kind of backlight is generated similar to the light of fluorescent lamps: by gas-discharge. Flat screens with quicksilver-light exert a discontinuous spectrum, containing unnatural short-waved fractions of blue and violet and very low energy-pikes in the red spectrum as well.

This „blue-light“ is much more refractive than red light and is focused in our eyes at another level which leads to fuzziness, unsharpness and color-distortion. One of the main reasons why pilots are often wearing yellow glasses filtering blue-light and boosting eyesight and contrast.

In order to protect yourself against the radiation of computer screens the GOLD CARD can be fixed on the backside of the monitor. If you are using a laptop or touchpad you might use a GOLD CHIP.

The huge advantage of these products: they do not "overcharge" do not have to be "purified" and, last but not least:

we offer a 10-year warranty of functionality !

GOLD CARD INFORMATION ABOUT ELECTRIC SMOG

The GOLD CARD, manufactured with pure crystalline silicon and 24 carat gold foil, reliably protects the whole organism from the influence of harmful electromagnetic radiation. This card protects those who work or sojourn regularly in an environment of e-smog emanating devices and vehicles such as:

computers, screens, cash registers, photo copiers, artificial lighting, in the train, tramway, in the car, mobile phone antennas, TVs, etc. etc.

Characteristic symptoms caused by electric smog:

- susceptibility to infection
- cancer, rheumatism, arthritis, tumors
- tiredness even after long sleep
- slight to heavy tensions in the limbs
- tendency to nervousness and depression
- bad or restless sleep, allergies, headaches

It may be risqué, by virtue of the scientific yada yada on the part of the manufacturers of electronic devices, that we permit ourselves to make such a statement and to claim, that the GOLD CARD and the GOLD CHIP really protect.

Hey, why don't you ask your Touch for Health® practitioner and ask him/her to test the impact of the radiation on your body: with and without the GOLD CARD / GOLD CHIP !

Try me that he/she will be totally surprised !!!
